

Insights Agents

GenAI Platform for Enterprise Insights Generation

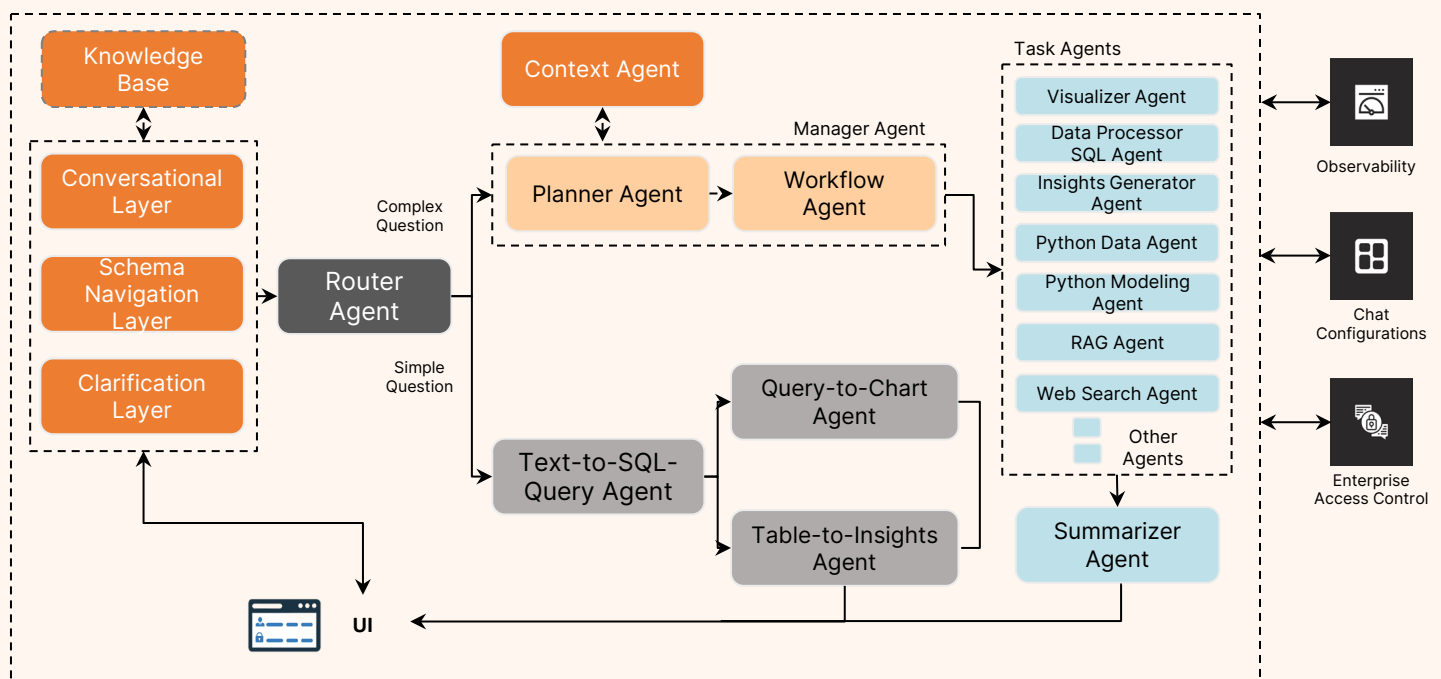

Solution Overview

Insights Agents is an agent-driven AI tool that generates business insights from structured data using Large Language Models (LLMs). It breaks down user questions into specialized tasks - like SQL generation, charting, insights synthesis, RAG-based enrichment, and ML modeling - executed by intelligent agents. The tool delivers end-to-end analysis, making data interpretation accessible and dynamic for business users.

Features

- Handles multi-table joins, complex business metrics, ML models, and multi-modal outputs including narrative summaries and visual analytics.
- Empowers users to ask follow-up questions, refine queries, and explore data through an intuitive, chat-based interface—no SQL or coding required.

Value Proposition & Customer Implementations

Natural Language Insights from Complex Healthcare Data

Client: Leading global healthcare & pharma manufacturer

Outcome: Enabled business teams to generate deep, ad-hoc insights from structured data, reducing manual analysis time and dependence on technical teams.

Accelerated Decision-Making from Account Receivables

Client: Global HVAC, and security equipment leader

Outcome: Delivered real-time cognitive insights from Account Receivables data via natural language queries, with 79% accuracy and average response time of ~25 seconds.

Real-Time Retail Insights Without Dashboard Overload

Client: Fortune 500 global specialty retailer with 1,300+ stores

Outcome: Enabled natural language querying of key business metrics with >90% accuracy in SQL and chart generation and accelerating decisions across sales and operations.
